"Every human embryologist, worldwide, states that the life of the new individual human being begins at fertilization." —Ward Kischer, Ph. D, Human Embryologist, University of Arizona

I can hear my mom’s heartbeat, her voice, and music playing! I have eyelashes, and mom can feel my kicks as tiny flutters.

I swallow, suck my thumb, and inhale & exhale amniotic fluid.

I can squint, retract my tongue, & I have tiny fingerprints and fingernails!

I have brain waves & reflexes! My teeth buds are present, & skeleton complete. I start moving today!

I've got my eyes, ears, mouth, kidneys, & liver.

It is common sense that **HURTING HUMAN BEINGS IS WRONG.**

By committing acts of aggressive violence against other human beings, we deprive them of their basic inalienable right to life.

**Q.E.D:** Abortion (the intentional and aggressive killing of the preborn human child) IS WRONG.

The biology is pretty clear: the product of a same-species reproduction is also a unique, differentiated, whole member of the same species.³

I.e.: We're human beings from the moment sperm meets egg at fertilization. We're not giraffes or trees.

As Atheist/Agnostic philosopher Immanuel Kant outlined in the *Groundwork of the Metaphysics of Morals*, humans bear the nature of rational beings -- and as such, must always and consistently be treated as an ends in themselves.¹ This nature as particularly rational is co-instantly present as long as we bear the nature as human: from the moment of our conception until our moment of death.

Science gives us the facts: fertilization between two human gametes creates a new, distinct, whole, unique, living human being. And scientifically speaking, abortion kills this young human being through starvation, poisoning, or dismemberment. Common sense tells us: discrimination & violence are contrary to our inherent human equality. Abortion is based on very ageist, ableist reasoning. Anyone committed to equality should oppose this lethal discrimination and rehumanize the preborn.
